Green Marine is waste management company.

Our mission is to protect marine ecology and environment. For achieving that purpose the full range of waste management services are rendered. We fulfil environmental politics of the GreenPort, mainly directed to environmental protection and prevention of pollution

Green Marine is the branch of The Port of Tallinn, operating since 2003.

We serve our clients **24/365**.

We collect and handle:

- ✓ domestic waste
- ✓ biodegradable waste
- ✓ oily waste
- ✓ solid hazardous waste
- ✓ construction waste
- ✓ sewage and graywater

We contribute to:

- ✓ sorting waste at the place of occurrence
- ✓ waste recycling
- ✓ innovative solutions

INNOVATIVE SOLUTIONS

Domestic waste collecting system is exclusively based on multi-lift container park.

INNOVATIVE SOLUTIONS

For collection of bilge water, sludge and sediments of these waste types we use both mobile and stationary equipment.

INNOVATIVE SOLUTIONS

In the year 2010 the mobile technological oil-polluted waste processing complex was built.

- It's capable of processing water with hard pollution of oil and chemicals
- Processing capacity 15m³/h

EXAMPLES OF HANDLED WASTE

Recyclable waste

cardboard

used cooking oil

glass

wooden pallets and other timber

EXAMPLES OF HANDLED WASTE

Liquid and solid hazardous waste

paint

fluorescent and energy saving light

oil-polluted waste

batteries and accumulators

VEHICLES

Scania multilift trucks

Scania tank-trucks

Volvo garbage car

Mitsubishi Canter trucks

Lifters

ENVIRONMENTAL PROTECTION
